

# Command Line Interface

## Command Line Interface — ANGULAR\_POINT\_OF\_SALE

**Upstream:** <https://github.com/nicedoc/angular-point-of-sale>

### Anticloud CLI

```
```bash
```

### Install

```
pip install anticloud-angular-point-of-sale
```

### Run offline with PAX inference

```
anticloud-angular-point-of-sale --offline --pax-local
```

### Run with AIOSS logging

```
anticloud-angular-point-of-sale --aiooss-log ./ledger.jsonl
```

### Single binary (after build)

```
./angular_point_of_sale --config config.yamll
```

### Options

| Flag              | Description                                |
|-------------------|--------------------------------------------|
| ---               | ---                                        |
| --offline         | Disable all network calls                  |
| --pax-local       | Use local PAX inference at 127.0.0.1:11434 |
| --aiooss-log PATH | Write AIOSS audit chain to PATH            |
| --encrypt         | Enable AES-256 at rest for output files    |
| --gpu             | Force GPU inference                        |
| --cpu             | Force CPU inference                        |
| --config PATH     | Load configuration from YAML file          |
